Unreported Errors in the Intensive Care Unit: A Case Study of the Way We Work
Elizabeth A. Henneman
This case study highlights some of the challenges in identifying and reporting system failures from the perspective of an experienced critical care nurse and patient safety researcher.

Induced Hypothermia for Patients With Cardiac Arrest: Role of a Clinical Nurse Specialist
Teri M. Kozik
This article discusses the development and implementation of an evidence-based protocol to induce hypothermia and improve outcomes for patients with cardiac arrest.

Reliability of Height and Weight Estimates in Patients Acutely Admitted to Intensive Care Units
Rogier M. Determann, Esther K. Wolthuis, Peter E. Spronk, Michael A. Kuiper, Johanna C. Korevaar, Margreeth B. Vroom, and Marcus J. Schultz
The authors analyze whether estimated height and weight agree with measured height and weight and with values provided by patients or their closest relative.
